Growers of
Quality Evergreen
Seedlings and
Transplants

To Our Customers:

We wish to thank our many customers and friends for the splendid business given us the past seasons, and we hope to have the pleasure of serving you in the future.

Our new list contains many species and varieties that are suitable for Christmas and reforestation production. Our seeds are carefully chosen from America's and Europe's finest forests, giving you hardy, high quality stock at a very economical price. Only our large production makes our thrifty prices possible.

If any problems arise over the coming year please feel free to write us. We will be more than happy to help you.

We are looking forward, with confidence, in having the opportunity of serving your evergreen planting needs for the coming season.

Cordially yours,

FLICKINGERS' NURSERY

WHOLESALE PRICE LIST

Seedlings And Transplants

Scotch Pine

Scotch Pine is the most popular and suitable tree for the Christmas market. Its popularity has increased each year, with growers, as it responds well to shearing, producing a beautifully uniform and compact tree. In well managed plantations high percentage cuts are the rule. The future looks bright as markets are increasing each year.

The needles are dark green to bluish green, two in each cluster, ranging from 1½" to 3" long. It has the largest range of soil and climate adaptivity of any of our popular evergreens.

Most of our seeds are imported directly, by us, from Europe's finest forests. This insures you of the highest quality parentage. All of the varieties that we list are desirable from a color-holding standpoint.

The varieties that we are listing this year are as follows: Special Strain, Spanish, French, Domestic (Lake States), and Austrian Hill. These trees are of a deep green color and are of medium needle length. Grown in low density beds to insure heavy thrifty plants. All two and three year stock are root pruned to produce a more fibrous root system insuring a better rate of survival.

Our Special Strain has won many friends over the years. It has the shortest needle length of any of the pines that we offer. The color is bluish green which it holds all winter long. Many well shaped buds produce a very full tree, which lessens shearing. Slow, thrifty growth. A planting of this strain is now at the Ohio Experimental Station, Wooster, Ohio. It has received their highest award for color. We have them in Christmas tree size for your inspection.

Scotch Pine —Special Blue Green Strain

			Per 100	Per 1000
2 yr. Seedlings	2-0	2- 4"	\$ 2.00	\$12.50

SCOTCH PINE

Scotch Pine—Austrian Hill

			Per 100	Per 1000
2 yr. Seedlings	2-0	2- 4"	1.50	8.00
2 yr. Seedlings	2-0	4- 8"	3.00	18.00
3 yr. Seedlings	3-0	10-16"	4.00	25.00
4 yr. Seedlings	4-0	20-30"	5.00	32.50

Austrian Pine —Lower Alpine Strain

Beautiful, dark green, long needled Christmas, Ornamental and Shelterbelt tree.

2 yr. Seedlings	2-0	3- 5"	2.00	15.00
3 yr. Seedlings	3-0	8-14"	4.00	28.00

AUSTRIAN PINE

SAGAMORE, PENNA.

American Red Pine

Very desirable Christmas and timber tree; also for ornamentals and windbreaks. Long needled and deep green color.

			Per 100	Per 1000
2 yr. Seedlings	2-0	3- 5"	2.00	15.00
3 yr. Seedlings	3-0	5-10"	4.00	25.00

White Pine

Soft bluish green needles. Desirable for Christmas, Ornamental and timber trees.

3 yr. Seedlings	3-0	5-10"	4.00	28.00
4 yr. Transplants	2-2	6-12"	8.00	60.00

Ponderosa Pine

Long needled Western yellow pine. Excellent timber and windbreak tree. Deep blue-green color.

3 yr. Seedlings	3-0	8-12"	3.50	25.00
-----------------	-----	-------	------	-------

NORWAY SPRUCE

Japanese Black Pine

Light green needles, 4½" long. Valuable for use in exposed conditions along seashore. Fast growing.

			Per 100	Per 1000
2 yr. Seedlings	2-0	4- 6"	4.00	25.00

Norway Spruce

Fast growing, short needled tree in high demand for Christmas and ornamental use. Straight stems and deep green color.

2 yr. Seedlings	2-0	2- 4"	2.00	12.50
2 yr. Seedlings	2-0	4- 8"	3.00	20.00
3 yr. Seedlings	3-0	7-14"	5.00	30.00
4 yr. Seedlings	4-0	10-18"	7.00	38.00
4 yr. Transplants	2-2	8-16"	9.00	60.00
6 yr. Transplants	2-4	18-24"	15.00	

White Spruce

Similar to Norway but a slower rate of growth. Short bluish green needles and compactness are characteristic. Survives drier sites than Norway.

2 yr. Seedlings	2-0	4- 8"	3.00	20.00
3 yr. Seedlings	3-0	6-12"	5.00	30.00
4 yr. Transplants	2-2	6-12"	9.00	60.00

Colorado Blue Spruce

One of the finest trees for ornamental and Christmas tree use. Range in color from slightly blue-green to marvelous blue. Our stock is from hand picked blue trees in Colorado.

2 yr. Seedlings	2-0	4- 6"	4.00	20.00
3 yr. Seedlings	3-0	6-10"	6.00	38.00
4 yr. Seedlings	4-0	10-18"	8.00	50.00
(Heavy Grade)				
4 yr. Transplants	2-2	6-12"	10.00	75.00
5 yr. Transplants	2-3	10-15"	12.00	90.00
6 yr. Transplants	3-3	15-18"	18.00	

Black Hills Spruce

Compact and pyramidal in habit. Bluish green needles ½" in length. Very hardy — grows well in a variety of soils. Fine ornamental and Christmas tree.

3 yr. Seedlings	3-0	4- 6"	4.00	
-----------------	-----	-------	------	--

Engelman Spruce

Similar to White Spruce in shape, but slower growing. Good blue color.

			Per 100	Per 1000
3 yr. Seedlings	3-0	5-10"	5.00	30.00

Douglas Fir —Colorado Blue Strain (Glaucous)

Soft bluish green foliage. Superior ornamental and Christmas tree. Retains needles well. Hardest strain.

2 yr. Seedlings	2-0	4- 8"	4.00	25.00
3 yr. Seedlings	3-0	6-12"	5.00	32.50
3 yr. Seedlings	3-0	8-15"	7.00	
4 yr. Transplants	2-2	6-12"	10.00	70.00

Douglas Fir —British Columbia, gray strain

Fastest growing type. Green color.

2 yr. Seedlings	2-0	6-12"	4.00	25.00
-----------------	-----	-------	------	-------

BLUE SPRUCE

Concolor Fir

Excellent as ornamental or Christmas tree. Silver trunk and soft silver foliage. Good needle retention. Grows best in well drained soil.

			Per 100	Per 1000
3 yr. Seedlings	3-0	6-12"	6.00	40.00
3 yr. Transplants	2-1	4- 7"	9.00	60.00
7 yr. TT, Field,		10-15"		.75 each
(Sold in lots of 10 or more)				

Balsam Fir

Widely used for Christmas trees and ornamentals. Good fragrance. Grows best in cool, moist and sheltered locations.

2 yr. Seedlings	2-0	2- 4"	3.00	20.00
-----------------	-----	-------	------	-------

Canadian Hemlock

Graceful growing habit with slender short flat needles ranging in color from dark to light green. Excellent for hedges or specimen ornamentals. Grows well in full shade or full sunlight. Likes moisture.

2 yr. Seedlings	2-0	4- 8"	6.00	40.00
3 yr. Transplants	2-1	5-10"	10.00	65.00

American Arborvitae

Popular for hedges and ornamentals. Hardy and easily transplanted. Grows well in a variety of soils but best in loamy, moist soil.

2 yr. Seedlings	2-0	4- 8"	4.00	20.00
3 yr. Seedlings	3-0	8-16"	6.00	35.00

Japanese Larch

Not evergreen but similar in appearance. Fast growing — has use as poles. Beautiful light green needles.

2 yr. Seedlings	2-0	10-16"	4.00	25.00
-----------------	-----	--------	------	-------

Juniper Virginia—Red Cedar - Platte River

Tall pyramidal with light green foliage. Ornamental and understock use.

2 yr. Seedlings	2-0	6-12"	4.00	28.00
-----------------	-----	-------	------	-------

Ground Cover—Myrtle, Vinca Minor, Periwinkle

Small shiny evergreen leaves with violet-blue flowers in the spring. Grows well in shade or sun. Valuable to cover hard to mow banks, under trees and planters. Plant 1 foot apart.

Clumps—15 to 25 leaders Heavy			8.00	50.00
-------------------------------	--	--	------	-------

European White Birch

Bark turns white after 3 to 4 years. Very effective in landscaping — summer or winter.

		Per	Per
		100	1000
2 yr. Seedlings	2-0 10-20"	8.00	55.00

White Flowering Dogwood

One of the most popular of our native trees. In early spring it is covered with white-petaled flowers and in fall with red berries and crimson leaves.

2 yr. Seedlings	2-0 12-18"	6.00
-----------------	------------	------

Tulip Poplar

A hardy ornamental and important forest tree often known as yellow poplar. Light green, glossy, fiddle-shaped leaves and greenish-yellow tulip-shaped flowers.

2 yr. Seedlings	2-0 10-20"	6.00	40.00
-----------------	------------	------	-------

Chinese Chestnut — Ching Chow Variety

Blight resistant. Bear large delicious nuts. Valuable for ornamental use. Sold in lots of 10 at the 100 rate.

1 yr. Seedlings	1-0 8-16"	25.00
-----------------	-----------	-------

Japanese Maple — Acer Palmatum

Grows no taller than 8-10 feet. Makes excellent specimen for yard or formal garden. Green to light red.

2 yr. Seedlings	2-0 5-10"	9.00	60.00
-----------------	-----------	------	-------

Rosa Multiflora — Living Fence

Very fast growing. Excellent wild life shelter.

1 yr. Seedlings	1-0 5-10"	3.00	15.00
2 yr. Seedlings	2-0 10-20"	5.00	25.00

Black Locust

Excellent tree for soil conservation. Makes rot resistant fence posts.

1 yr. Seedlings	1-0 6-12"	3.00	20.00
-----------------	-----------	------	-------

ROOTED CUTTINGS

Rooted in our own greenhouse using the most modern techniques to produce a short sturdy plant with heavy roots. Cuttings taken from choice parent plants that have desired characteristics. With each order, or upon request, comes our pamphlet "ROOTED CUTTINGS TO FIELD LINERS." Plants shipped about May 10, 1963.

Taxus Cuspidata (Spreading Japanese Yew)

Deep green color year round. Choice spreader.

Rooted cuttings	4-6"	12.00	90.00
-----------------	------	-------	-------

Taxus Capitata

Upright Japanese Yew. Makes perfect pyramid with excellent color year round.

		Per 100	Per 1000
3 yr. transplants	6-10"	18.00	
2 years seed bed, 1 year 2¼" peat pot			

Taxus Hicksi (Upright Japanese Yew)

Deep green color with numerous branches that ascend vertically.

Rooted cuttings	4-6"	12.00	90.00
-----------------	------	-------	-------

Hetzi Juniper

Fast growing blue spreading juniper.

Rooted cuttings	4-6"	12.00	90.00
-----------------	------	-------	-------

Andorra Juniper

Low horizontal spreader. Light green foliage turning purple in the fall.

Rooted cuttings	4-6"	12.00	90.00
-----------------	------	-------	-------

Irish Juniper

Pyramid type juniper. Used in foundation and memorial plantings.

Rooted cuttings	4-6"	12.00	
-----------------	------	-------	--

Globe Arborvitae

Woodward strain. Perfect globe shape with no shearing.

Rooted cuttings	4-6"	12.00	90.00
-----------------	------	-------	-------

American Holly

Glossy green leaves and brilliant red berries. Used in foundation plantings, hedges, specimens or holly orcharding. Our parent plants have withstood temperatures of -20 degrees. With each order, or upon request, comes our pamphlet "SUCCESSFUL GROWING OF RHODODENDRONS, AZALEAS AND HOLLIES." Sold in lots of 10 at the 100 rate (20% male plants unless otherwise stated).

Hedgeholly—Self branching and dense grower. Medium glossy leaf. Outstanding for all uses (Female plant)

Yule—A top rated variety and heavy fruiter with a large leaf. (Female plant)

Santa Claus—Male plant that flowers when young. Shapes well with shearing.

Rooted cuttings, with soil ball. All plants have made new growth — Similar to 1 yr. transplants.

4-10"	25.00
-------	-------

JUNIOR ORNAMENTALS

All of our Junior Ornamentals are field grown, 5-6 years old, twice transplanted, root pruned and sheared many times. This is quality stock costing many times less than it will be worth in a few years.

Japanese Yew

Deep rich green foliage. Grows well in either sun or shade. Considered by most the best ornamental plant for foundations.

		Each	5 or more
Cuspidata, spreading	10-15"	1.25	1.15
Capitata, upright	10-15"	1.25	1.15

Globe Arborvitae

Small round, globe shaped ornamental, where low growth is desirable.

Woodard — Dark green, heavy, bushy with spread of

8-10"	1.00	.90
-------	------	-----

American Arborvitae

Popular upright for corners of foundation plantings and hedges.

18-24"	1.10	1.00
--------	------	------

Hetzi Juniper

Fast growing blue spreading juniper

12-15"	1.10	1.00
--------	------	------

Azalea Mollis

Hardy variety. Ultimate height 4-6 feet. Mixed colors ranging from light salmon, peach, yellow, orange and red. Plants are branched and mostly budded.

Mixed colors	10-12"	1.50	1.40
Red	10-12"	1.75	1.65
Yellow	12-15"	1.75	1.65

Rhododendron — Hybrid

Hardy hybrids for northern conditions. With each order or upon request comes our pamphlet "Successful Growing of Rhododendrons, Azaleas and Hollies." Cutting grown, twice transplants with soil ball. Branched — 10-15"

Album elegans (White)	3 yr. TT	2.50	2.25
Grandiflorum (Lavender)	3 yr. TT	2.50	2.25

Canadian Hemlock

Lacy, graceful growing habit. Can be planted in sun or shade. Makes excellent hedges as it can be sheared to any shape and kept small for many years. Also good for wind-breaks or corners of foundation plantings.

12-15"	1.25	1.15
--------	------	------

FLOWERING SHRUBS AND SHADE TREES

Pink Flowering Dogwood

Beautiful small tree with pink-petaled flowers early in the spring. Bright red foliage in the fall. Budded stock.

	Each	5 or more
12-18"	1.50	1.35
3- 4'	3.25	2.90

White Birch

One of the most beautiful shade trees. When mature the bark is white and leaves are a fine light green. These plants have heavy trunks with breaks developing on some.

heavy	6'	2.75	2.50
-------	----	------	------

Pin Oak

One of the better known shade trees. A rapid grower. Fine, deeply cut leaves that turn beautiful colors in autumn. Approximate height 75 feet.

4-5'	1.50	1.40
6'	2.00	1.90

Norway Maple

Used in street plantings or lawn specimens where dense shade is desired. Leaves are a rich green.

5- 6'	1.75	1.60
-------	------	------

Faassens Red Leaf Maple

Large maple having deep crimson purple foliage during growing months. Similar to Crimson King Maple.

4- 5'	2.75	2.50
-------	------	------

Flowering Crab — Almey

New introduction. Most beautiful flowering crab in America. The tree is upright, vigorous and hardy. Almey blooms young, producing a multitude of fiery, crimson flowers. Most trees will bloom this year!

3- 4'	1.75	1.60
-------	------	------

Purpleleaf Plum—variety Thundercloud

Holds dark purple color throughout growing season. Strong upright grower. Pink flowers in great profusion in spring.

Branched	5- 6'	1.75	1.60
----------	-------	------	------

Forsythia — Golden Belle

This shrub is one of the most beautiful of the early flowering shrubs, covered with golden, yellow flower from top to bottom in the most profuse manner.

	Each	5 or more
3-3½'	.90	.80

Skyline Locust — Patent No. 1619

Outstanding new shade tree. Characterized by straight strong trunk, heavy dark green foliage, freedom from diseases, does not heave side walks, grass grows up to trunk, no leaf raking in the fall and very rapid growth.

4-5'	Each	\$3.50
------	------	--------

Sunburst Locust — Patent No. 1313

Foliage is golden bronze, limited to 8-10 inches of branch tips. Color is retained all summer. Well-formed, symmetrical top with spreading habit. Very attractive in contrast with green foliaged trees. Rapid growth.

4-5'	Each	4.00
------	------	------

EVERGREEN SPECIAL

25 Transplanted evergreen trees. Four years old 2-2. Postpaid at planting time.

5 Norway Spruce	8-14"
5 Austrian Pine	8-14"
5 Blue Spruce	10-15"
5 Scotch Pine	12-18"
5 White Pine	6-12"

Only \$5.00

PLANTING GUIDE

CARE OF STOCK ON ARRIVAL

If trees are to be planted within a day or two they may remain in the containers they arrive in, although they must be watered and kept out of the sun or drying wind. If planting is to be delayed longer they must be heeled in. This is done by taking the trees out of the container, dipping their roots in water, selecting a sheltered spot away from sun and wind, digging a trench 6 to 8 inches deep — in a V shape with about 45 degree angle, cover the roots of the trees with moist soil and keep well watered until planted in the field.

KINDS OF PLANT

At the present time Scotch Pine is in largest demand, and all indications point to the fact that it will continue to be the biggest seller in the future. At present it is reported by Federal Crop Reporting that 75% of plantation trees sold for Christmas use are Scotch Pine. In addition to Scotch most growers like to have some Austrian and White Pine in their plantations, as they are in good demand in smaller quantities. The parts of your plantation that are moist and has a heavier soil is highly advisable to plant spruce. Norway has long been a favorite as it is the fastest growing spruce and requires little or no shearing. In the last few years a close relative, White Spruce, has been catching up. White Spruce grows well in the same type of site and much better on drier soils. It is slower growing, more compact than Norway, and has a beautiful bluish cast in the fall.

Among the firs, Douglas seems to be the best adapted to the Allegheny and Appalachian region. Some areas experience frost damage, so if in doubt, it is wise to ask the advice of your County Agent or an experienced grower.

Most growers are interested in a diversified planting. Planting 75 percent of your land in pines and 25 percent in spruce and fir has worked satisfactory for most people.

WHEN AND HOW TO PLANT

From past experience we have learned that early Spring is the best time to plant. As soon as the frost leaves the ground and danger of any other heavy freezes are past one may begin planting. This period is usually around the first of April, with yearly and local variations. In fall planting, if in doubt, consult an experienced grower, or your county agent. The planting period is usually from September 20 to the end of October. The following is a chart with distances and the number of trees required per acre.

5 x 5'		1742	Trees
4 x 4'		2722	Trees
5 x 6'		1452	Trees
6 x 6'		1210	Trees

The smaller spacings are satisfactory for Spruce and Fir plantings and the 5 x 5' or 5 x 6' spacings for the pines. The 5 x 6' spacing appears to be ideal for pines if one intends to mow, if not the 5 x 5' will prove satisfactory.

On small or hilly plantings the hand method will work best. To make your rows straight space stakes at intervals. Each planter uses a bucket with the roots of the trees covered with muddy water. The holes are opened with a maddock and the tree planted very firmly by using the heel of a shoe. One man should be able to plant about 1000 trees per day by using this method.

On large plantings, where the site is suitable, the use of a planting machine is much faster and more economical. A crew of 3 or 4 men can plant 8,000 to 10,000 trees per day. Planting machines can be contracted to do the work for about \$15.00 per thousand trees. The contractor should be contracted some time in advance so as to assure you of getting your trees planted when you want.

CARE OF YOUR TREES

Where grass and weeds are not too dense and thick mowing is not necessary. Where grass is so thick as to shut out light and air it is desirable to mow with a power driven mower.

Brush and undesirable hardwoods must not be allowed in plantations as they will seriously hinder the amount of trees to be eventually cut. They can sometimes be eliminated by power methods, otherwise a brush axe or hand scissors with good leverage will work well. Paint the stumps with brush killer so that they will not resprout. In the case of insect or disease damage contact your local county or extension university agent. They will be able to tell you what insect you have and control measures. Fire is also a hazard. Make roads and firebreaks that are kept mowed or disked.

SHEARING OR PRUNING

Shearing develops a solid, extra heavy branched and bushy tree that brings a premium price. Shearing is usually started in about the third year, and is done before the new, tender growth starts to get tough and woody. In Pennsylvania this time is about June 10 to Aug. 1 for pines; spruces and firs may be sheared from August 1 to April.

Hedge shears with blades 8-10" are most commonly used. One must first keep in mind to trim the tree in the shape of a cone, starting at the top. Shear only the new growth unless some radical change is needed. The top or terminal shoot is first cut back to 10-12", making a slanting cut so that the tree will not become double topped. The laterals of the terminal shoot are cut about 2-3" shorter than the terminal itself. The rest of the tree is sheared keeping in mind the cone shape. Treat each tree as an individual! If in doubt contact your county agent as to time and place of shearing demonstrations.

GETTING YOUR TREES INTO HOMES

The best way of getting buyers, if you are new, is to run advertisements in large city newspapers. September is a good month. Require a deposit on each order to be deducted from the last truck load of trees. Sell for cash or certified check if the buyer is unknown to you. If you have the opportunity you might try to retail some trees. This will bring a much higher price per tree.

TERMS

No order can be accepted for less than 50 trees, unless otherwise noted in this list. Fifty of one size and kind at the 100 rate, 500 at the 1000 rate. Transportation charges are to be paid by the customer (except on Special Offers), F.O.B. our shipping point. Please do not remit for shipping charges as cost cannot be estimated. Our liability ceases when trees are delivered to carrier. Claims for errors, shortages, etc., must be made within five days after receipt of shipment to receive consideration.

Orders may be booked with 10 percent with order, balance before shipment or shipped C.O.D. Credit extended with proper references. Accounts due past 30 days will be charged interest at the rate of 6% per annum. Minimum order \$5.00 — orders under \$5.00 add \$1.00 for handling charge.

QUANTITY ORDERS—5% discount on orders having combined species of 10,000 or more. Special rates on larger quantities.

Pennsylvania residents must add 4% sales tax to *ornamental* stock that is not to be resold. If you plan to resell or grow on for resale file an exemption certificate with us. (Pennsylvania residents add the above tax to our Special offers, Junior ornamentals, Flowering shrubs and Shade trees *only*)

Our spring season begins approximately March 15 and extends to May 15. Fall shipping from Sept. 20 to Nov. 1. During shipping season nursery will be open 8:00 A.M. to 9 P.M. After shipping season our office is open 8:00 A.M. to 5:00 P.M. Open other hours by appointment.

PICK-UP ORDERS—Notify us 3 days in advance.

Orders accepted subject to prior sale of stock, crop injury or loss from any cause beyond our control.

LOCATION

We will appreciate it, if you will give us the names and addresses of friends interested in good nursery stock. Thank you.
